It was found that the verdict rendered was that they find Doyle guilty of murder in the first degree. New Cure for Palpitation. A cure for the arrest of palpitation of the heart has just been given to the world by a medical correspondent, an account of which we take from the *Medical Times of London*. As a great many persons are subject to this disease, it would be well to make a note of what the correspondent advises. Palpitation when not depending upon organic diseases, may be almost immediately arrested by bending the head forward and allowing the arms to hang down. The correspondent further adds that the effect is even still more rapidly produced by holding the breath a few seconds while the body is in that bent position. The cure has been tried by a medical friend of ours, who is subject to the disease, and he says the effect is wonderful. As soon as he placed himself in the position described the palpitation was immediately stopped.
